Freedom of Information Act 2000

I am writing in response to your request for information made under the Freedom of Information Act 2000 in relation to Prescribing data in Oncology 01.11.2015- 31.10.2016.

I am writing to request hospital prescribing data for the attached list of chemical substances being used in Oncology.

The data is required for all generic and branded prescriptions of these and I would request to provide this in the attached format.

NOTE: At the time this report was run, it was not possible to remove non-oncology work from the pricing figures. Also where drug have an emtansine type combination these have been accumulated. We have produced a list of drugs and the number of distinct appointments booked for them for the period 1.11.2015-31/10/2016.

We have included the list of chemical substances from the FOI request – we have several possible flavours of e.g. Trastuzumab so have included all these just in case and haven't added them up in case some need to be excluded.
