Freedom of Information Act 2000

I am writing in response to your request for information made under the Freedom of Information Act 2000 in relation to Cancer treatment 2010 – 2016.

How many patients were treated for cancer by your trust each year since 2010?

How many of these patients in each year were 'self-funders' or paid the trust for their treatment, either personally or through an insurer and other third party?

What was the total amount of money raised in this way for each year?

How many patients for each year were ordinary NHS patients, ie patients whose care was free at the point of delivery?

How many designated cancer wards does your trust have for each year since 2010?

How many wards, if any, were for 'self-funders' and how many were for ordinary NHS patients for each year since 2010?

There were two designated cancer wards for all patients in 2010 but from 2011 onwards there is only one designated cancer ward.

This response details the number of patients that underwent Oncological treatment (chemotherapy, biological agents, supportive therapies, external beam radiotherapy and brachytherapy) and does not include surgical treatments:
