Freedom of Information Act 2000

I am writing in response to your request for information made under the Freedom of Information Act 2000 in relation to EPR or PAS.

You asked:

- 1. What are your plans regarding procuring EPR functionality (either via an integrated EPR or departmental systems as best-of-breed) or PAS?*
- 2. Will you be procuring new EPR functionality or PAS in the next 2 years?*
- 3. What is the contract expiry date for your existing EPR and PAS services?*
- 4. What are your plans regarding implementing ePMA functionality?*
- 5. What plans do you have for procuring other digital capability in the next 2 years?*

Trust response:

1. We have procured a EPR system which will allow us to integrate with PAS and other systems within the Trust.
2. No
3. 2028
4. EPMA is within the EPR system functionality which we have procured and will be rolling out during 2020/21
5. All clinical systems outside of our EPR are currently being reviewed. If their functionality can be absorbed into our EPR system then they will be disinvested. If they cannot be replaced then when the licence is due for renewal then these will be put out to tender following guidelines. Any new system requirements not currently within the Trust or cannot be provided by EPR or existing systems will go out to tender as and when required with full specification of need.
