## Freedom of Information Act 2000

I am writing in response to your request for information made under the Freedom of Information Act 2000 in relation to PPE Fit testing.

You asked:

- 1)Genders of participants
- 2)Pass rates
- 3)Specific types of masks that were assessed (we are particularly interested in FPP3 masks)
- 4) Qualitative or quantitative testing measures
- 5) Any further demographic data attached to participants e.g. age and ethnicity.

## Trust response:

Please see below responses which have sought to answer the questions but we are unable to provide any further level of detail

- 1 & 5). We have attempted to provide the information sought on the FOI however, as an organisation we do not keep the records in the format that has been requested. To try and gather this information retrospectively would take more than the appropriate time and cost limit to fully answer this request Please see below responses which have sought to answer the questions but we are unable to provide any further level of detail To comply with Information governance the Trust would not hold information regarding an individual if it is not appropriate to do so. The requirement for age, gender and ethnicity has not been required to complete FIT testing on staff members as ALL staff members are offered the opportunity to be FIT tested. Age, gender and ethnicity is not captured as part of the FIT testing database.
- 2). See attached spreadsheet for database.
- 3). Types of masks assessed are listed on the database.

A embedded copy of the database is also below.

4). The FIT testing measure used provides a pass or fail result based upon the wearer of a specific hood whilst wearing an FFP3 mask detects the sweet or bitter tasting solution. This method introduces a controlled aerosol concentration into a hood fitted over the wearer. We use this test for the disposable and reusable masks. We have invested in Portacount equipment to further support FIT testing.
